After school, the first place Tammy always goes is the hospital. She isn't sick or anything; she's just visiting. She's seeing her brother Josh, and all the doctors and nurses know her by now.

## I See What You Mean, Doctor!

At Boston Children's Hospital, doctors are using technology to help kids see with their own eyes how their bodies work and are being treated. A kid-friendly app is also making it easier for them to understand difficult medical concepts.

Thanks to 3D imaging, young patients can now even take a virtual tour inside their own organs and understand their conditions better than ever before!
