

The big day is here.  
Alyssa is ready to take off.  
Ten, nine, eight, seven, six...

They are counting down!  
Space, here we come!

**LOOK**

What is Alyssa wearing?

## UP, UP & AWAY!

When rockets take off, they can travel at speeds of up to 58,000 km/h. This is pretty fast for huge objects that weigh over 100,000 kilograms!

They could fly around the whole Taiwan in less than two minutes!
